

A Message For UConn Undergraduate Students

Drug-Free Schools and Campuses Act Notification

Spring 2024

UConn strives to promote an environment that supports the health and safety of all members of the community.

To support the prevention and reduction of harm resulting from substance use, and in accordance with the Drug Free Schools and Campuses Act passed by Congress, the University provides an annual notice with information regarding alcohol and other substances. The following document provides a brief overview and links to information regarding UConn policy, impacts on health, potential legal sanctions, risk reduction strategies, and resources for support as they relate to alcohol and other substances.

UCONN
UNIVERSITY OF CONNECTICUT

Table of Contents

- Overview of Policy Statement
- **Health Effects & Impact, Policy & Law, and Risk Reduction Strategies for:**
 - Alcohol
 - Cannabis
 - Tobacco & Nicotine
 - Prescription Medication
 - Other Substances
- **Student Resources & Support**
- Appendix:
 - **Prohibited Actions**
 - **Sanctions**

Overview of Policy Statement

Our community at UConn is maintained by each individual and organization adhering to a code of conduct which emphasizes compassion, respect to self and others, honesty, and integrity.

The concern for these values and ethics are expressed in Responsibilities of Community Life: The Student Code, and in other policies published throughout the University. As members of the University community, students have an obligation to support the safety of their community by upholding this code.

The Student Code contains policy requirements established by UConn that define misuse of alcohol and/or other substances. These policies identify ways that the possession, sale, and distribution of alcohol and other substances may violate University policy.

To view the most up-to-date policy requirements for students, please visit:

community.uconn.edu/the-student-code

Alcohol

Alcohol is one of the most commonly used substances in the U.S. Whether you choose to drink or not, alcohol can impact your life and the lives of those around you, including family, friends, and roommates.

»»» Effects & Impacts on Health

- **In lower doses**, alcohol can cause euphoria, relaxation, and lowered inhibitions.
- **In higher doses**, and when consumed rapidly, alcohol can cause drowsiness, slurred speech, nausea, loss of coordination, impaired memory, sexual dysfunction, loss of consciousness, neurological deficits, increased risk of injuries, and fatal overdose.
- **Consumption of higher doses over time** is associated with increased risk of hypertension, heart disease, cancer, stroke, pancreatitis, liver inflammation (including cirrhosis), and alcohol use disorder.

»»» Alcohol Policy & The Law

In addition to impacting health, there can also be legal repercussions for alcohol-related violations. Violation of the law can result in criminal sanctions, which can adversely impact job opportunities, admission to graduate or professional schools, and eligibility for financial aid.

- **It is a crime for anyone under 21 to procure, possess, or transport alcohol.** Penalties include an infraction for the first offense, and up to \$500 for a second offense.
- **It is a crime to sell or supply alcohol to anyone under 21.** Penalties include a fine up to \$1000 and/or up to a year in prison.
- **It is a crime to misrepresent one's age, possess a fake ID, use someone else's ID, forge, or alter an ID, or let someone use your ID to obtain alcohol.** Penalties for using a fake ID to purchase alcohol include fines up to \$500, up to 30 days in prison, and/or a 150-day suspension of your motor vehicle license.
- **Consuming alcohol can impair one's ability to drive and can have legal consequences.** If you're over 21, it is illegal to drive with a blood alcohol content (BAC) of 0.8 or over. If you're under 21, it's illegal to drive with a blood alcohol content (BAC) of 0.2 or over.
- **For a more in-depth summary of relevant provisions of Connecticut liquor law, please click [here](#).**

»»» Reduce Your Risk!

- **Learn about and pour standard drinks, so each drink is REALLY only one drink.** Generally, 12 oz. of beer or hard seltzer that contains 4-5% alcohol (like a Bud Light or White Claw) = 5 oz. of wine = 1.5 oz. of 80 proof liquor. Keep in mind that many craft beers can contain higher percentages of alcohol (up to 18%!) which means a 12 oz. pour could contain well over 3 standard drinks!
- **Set limits you think will work for you.** Students who have 4 standard drinks or more (females) or 5 standard drinks or more (males) are at an increased risk for alcohol-related harm. Keeping your consumption below that number is a great place to start!
- **Recognize the signs of alcohol poisoning and call 911!** The signs that someone might be in trouble when it comes to alcohol aren't always clear. When in doubt, go with your gut. If you have a sense that something is wrong - you're probably right.

Cannabis

With the recent legalization of cannabis in CT for residents over 21, and the opening of new recreational cannabis dispensaries near campus, we know that cannabis is growing in acceptability and popularity - and you might have questions.

»»» Effects & Impacts on Health

- **At various doses**, cannabis can cause euphoria, relaxation, slowed reaction time, distorted sensory perception, impaired balance and coordination, increased heart rate and appetite, impaired memory, anxiety, and panic attacks.
- **Over time, consistent cannabis use** is associated with increased risk of frequent respiratory infections (when smoked), mental health concerns, and cannabis use disorder.

»»» Cannabis Policy & The Law

In addition to impacting health, there can also be legal repercussions for cannabis-related violations. Violation of the law can result in criminal sanctions, which can adversely impact job opportunities, admission to graduate or professional schools, and eligibility for financial aid.

- **Cannabis is legal to possess and consume in CT for residents over 21 - but remains illegal under federal law.**
- Since the University receives federal funding, **UConn is required to prohibit the use and possession of federally classified controlled substances, including cannabis.** This means that the possession or use of cannabis (recreational or medical) is prohibited on all University property, and during any University activity.
- **For more information regarding the regulation of adult-use cannabis, please click [here](#).**

»»» Reduce Your Risk!

- **Consider your timing, and avoid consuming cannabis before doing homework, taking exams, or going to class.** Cannabis can impact cognition, and it's important to have a clear mind before academic activities.
- **Choose lower potency cannabis**, that contains less "THC" (the active ingredient that causes a "high").
- **Avoid mixing cannabis with tobacco, alcohol, or other drugs.** Multiple substances in the body makes it harder to predict effects and increases your risk of adverse impacts.

Tobacco & Nicotine

While cigarette smoking has declined significantly in the last 15 years, it's still the leading cause of preventable disease and death in the U.S. The use of electronic nicotine delivery systems ("e-cigs" or "vapes") also contributes to preventable health issues, especially among young people.

➤➤➤ Effects & Impacts on Health

- **Using tobacco and nicotine over time** is associated with increased risk of diabetes, heart & lung disease, stroke, cancer (anywhere in the body, and especially in the lungs, throat, esophagus, etc.), and adverse pregnancy outcomes, such as preterm delivery, low birth weight, ectopic pregnancy, and stillbirth. These health impacts are also associated with the **inhalation of secondhand smoke**.
- **Nicotine itself is highly addictive**, and contains toxic substances that can harm adolescents, young adults, and developing fetuses.
- **Besides nicotine, the aerosol from e-cigs or vapes can also contain harmful substances**, including tiny particles that are inhaled deep into the lungs, cancer-causing chemicals, and heavy metals, like nickel, tin, and lead.

➤➤➤ Tobacco Policy & The Law

- **You must be 21 years of age or older to purchase and use tobacco products (including electronic nicotine delivery systems) in the state of Connecticut.**
- **For a more in-depth summary of relevant provisions of Connecticut smoking law, please click [here](#). For the UConn Smoking Policy, please click [here](#).**

➤➤➤ Reduce Your Risk!

- If you've never smoked or used other tobacco or nicotine products, including e-cigs & vapes, **don't start**.
- If you currently smoke or vape, **consider quitting!** Set up an appointment for tobacco cessation guidance with Student Health and Wellness or take advantage of online resources like smokefree.gov for support.
- If you do smoke or vape, **be respectful of your fellow Huskies**. Secondhand smoke contains particulate matter that can cause asthma attacks and lung irritation, which is why smoking is not permitted inside or within 25 feet of University-owned buildings here at UConn.

Prescription Medication

Misuse of prescription medication, or "non-medical use of prescription medication," involves using medication in a way or dose other than prescribed, taking someone else's medication, or taking medication specifically to get high. The most commonly misused types of medications include opioids (prescribed for pain), central nervous system depressants (typically sedatives and hypnotics prescribed for anxiety or sleep), and stimulants (typically prescribed to treat attention-deficit hyperactivity disorder, or ADHD).

➤➤➤ Effects & Impacts on Health

Health impacts of non-medical use of prescription medication vary, depending on which substance is used.

- **Use of opioids** can cause constipation, nausea, euphoria, slowed breathing rate, drowsiness, confusion, poor coordination, and increased sensitivity to pain.
- **Use of anti-anxiety medication & sedatives** can cause drowsiness, confusion, unsteady gait, slurred speech, poor concentration, dizziness, memory problems, and slowed breathing.
- **Use of stimulants** can cause increased alertness, irregular heartbeat, high blood pressure, high body temperature, reduced appetite, insomnia, agitation, anxiety, and paranoia.

➤➤➤ Prescription Medication Policy & The Law

In addition to impacting health, there can also be legal repercussions for prescription drug-related violations. Violation of the law can result in criminal sanctions, which can adversely impact job opportunities, admission to graduate or professional schools, and eligibility for financial aid.

- **It is a crime to sell prescription drugs, or to knowingly possess or deliver drugs that are not yours.** For a more in-depth summary of relevant provisions of Connecticut drug crime law, please click [here](#).

➤➤➤ Reduce Your Risk!

- **Take any medication prescribed to you according to the guidance given by your medical care provider.** For questions or concerns, consult with your provider before making any changes.
- **Keep your prescription medication to yourself.** Don't share your prescriptions with others and consider keeping them in a secure, locked place.
- **Seek out alternative study aids,** such as getting a good night's sleep, light exercise, or mindfulness practices, rather than using prescription stimulants.
- **Avoid combining prescription medications,** especially Adderall and other stimulants, with other substances including caffeine, tobacco, cannabis, and alcohol.

Other Substances

While alcohol, cannabis, tobacco/nicotine, and prescription medication have the most significant use on college campuses, there are other substances that have the potential to impact your health and the health of others and put you at risk of legal consequences.

- **Depressants**, (in addition to alcohol), including GHB, and rohypnol (roofies)
- **Stimulants**, (in addition to the prescription stimulants mentioned above), including cocaine and non-prescription methamphetamine
- **Hallucinogens**, including LSD (acid), MDMA (ecstasy, molly), and psilocybin (mushrooms)
- **Dissociatives**, including PCP, ketamine, and DXM (cough medicine)
- **Narcotics**, (in addition to the prescription opioids mentioned above), including heroin
- **Inhalants**, such as solvents, like gasoline and paint thinner, aerosols (spray cans), and gases (nitrous oxide and whippets)

»»» More Information

- **Acute effects and impacts on health vary depending on the substance. For a list of health impacts listed by substance, please click [here](#).**
- **In addition to impacting health, there can also be legal repercussions for controlled substance related violations. Violation of the law can result in criminal sanctions and adversely impact job opportunities, admission to graduate or professional schools, and eligibility for financial aid.**
- **It is a crime to knowingly possess, deliver, or sell controlled substances. For a more in-depth summary of relevant provisions of Connecticut drug crime law, please click [here](#).**

Resources & Support

UConn is committed to offering resources to support students who are experiencing impacts from substance use and wish to make changes.

Students struggling with alcohol and or drug use are encouraged to seek support from Student Health and Wellness, which provides screenings, brief interventions, and counseling, as well as recovery support services. Staff in Student Health and Wellness are experienced in working with substance use concerns and can provide direct assistance as well as information about off-campus assessments, treatment facilities, and area support groups.

UConn offers the following programs, services, and support for students related to the use of alcohol and other drugs:

- Free and anonymous online assessment tools for students to receive personalized feedback about [alcohol](#) or [cannabis](#) use in the convenience and comfort of their own space. **Available for students on all campuses.**
- [Recovery support services](#) for students in or seeking recovery from substance use disorders and/other mental and behavioral health disorders. This includes one-on-one recovery coaching, peer all recovery meetings, friends and family recovery meetings, and a wide array of social and service opportunities. **Available for students on all campuses.**
- [BASICS](#) (Balancing Alcohol and Substances to Improve College Success) is a program that connects you with a supportive and non-judgmental facilitator trained to help you explore your use of alcohol or other substances. The purpose of these sessions is to provide a private space where you can have an open conversation about these topics without feeling any shame or fear of consequence. Our goal is to help you identify what is working for you as well as any changes you may want to make to support your overall well-being. **Available for students on the Stamford & Storrs campuses.**
- [Alcohol and drug counseling sessions](#), that are designed to offer specialized help to those whose alcohol and other drug use has progressed beyond college experimentation. By identifying risks as early as possible, alcohol and drug counseling can help stop the progression of alcohol and substance-related issues. **Available for students on the Storrs campus.**
- [Group programming and trainings](#) for student groups and organizations, that aim to educate students about the impacts of alcohol and empower them to make the best decisions for the safety of themselves and their communities. **Available for students on the Storrs campus.**
- [Mental health resource centers](#), that can provide mental health support, including free and confidential appointments and referrals to community providers and services. **Available for students on the Avery Point, Hartford, Stamford, & Waterbury campuses.**

Appendix

A. List of Prohibited Actions as Outlined in the Student Code

Although Connecticut state law permits the use of medical and recreational cannabis (marijuana) for those over the age of 21, the use, possession, and/or cultivation of cannabis remains a crime under federal law.

As a recipient of federal funding, **the University is required to prohibit the use and/or possession of all federally-classified controlled substances, including cannabis.** Therefore, the possession and use of cannabis in any form, even if accompanied by a medical prescription, is prohibited on all University property and/or during any University activity.

Misuse of alcohol and/or other drugs includes, but is not limited to:

a. Illegal consumption and/or possession. Possession of alcohol is limited to persons 21 years of age or older. If an individual is under 21 years of age, that person is not permitted to consume alcohol or carry alcohol on their person on or off University property.

b. Strength of alcohol. Any alcohol that is stronger than 80 proof is not permitted on University of Connecticut property except where approved for academic purposes of the University.

c. Serving, distributing, and/or obtaining alcohol. Serving, distributing to, or obtaining alcohol for any individual who is under 21 years of age is prohibited. Allowing any person under the age of 21 to consume alcohol is also prohibited. Providing alcohol to a person who is visibly intoxicated and/or pressuring others to use alcohol is prohibited.

d. Public consumption. No alcohol is to be consumed in public areas and open containers of alcohol are not permitted in public areas on University property except in designated locations where the permittee assumes all liability of properly monitored events. “Public areas” are defined as any area that could be used for general use including, but not limited to, stairways, hallways, lounges, bathrooms, dining halls, arenas, libraries, academic and administration buildings, and outside of buildings on University property.

e. Location for consumption. Alcohol can only be consumed on University of Connecticut property where there is a liquor permit to serve alcohol or as defined by University policies. A consumer can only ingest alcohol at the event location.

f. Alcohol procurement. Alcohol may not be purchased with University funds or Student Trustee Organization funds.

g. Common source containers. Common source containers containing alcohol are prohibited on University property. This includes, but is not limited to, kegs and beer balls. Tap systems are only permitted on University property by a University licensed permittee.

h. Off-campus functions. All Registered Student Organizations (RSOs) must participate in the Student Activities Off-Campus Event Advising Process to receive risk management advising. Law School student organizations must assure compliance with the *School of Law Alcohol Policy*.

i. Driving under the influence. Driving under the influence of alcohol and/or drugs is prohibited.

j. Illegal drugs and paraphernalia. Possession and/or consumption of illegal drugs, including marijuana, is prohibited. Possession of drug paraphernalia is prohibited on University of Connecticut property.

k. Medications. Prescription drugs are permitted on University of Connecticut property if accompanied by an authentic medical prescription. Use of legal medication outside the parameters of the medical authorization is prohibited. Possession and/or use of prescription medications not prescribed to the user is prohibited.

l. Selling, distributing, or manufacturing drugs. The sale, distribution, and/or manufacturing of controlled substances or illegal drugs, including marijuana, except as expressly permitted by law, is prohibited.

B. Possible Sanctions

The following sanctions may be imposed, individually or in various combinations, on any student found to have violated The Student Code. Please note this is not an exhaustive list of sanctions:

- Warning
- University Probation
- University Suspension
- University Expulsion
- Additional sanctions, which may be in conjunction with the above sanctions. These include the loss of specific privileges, restitution, removal from housing, participation in educational initiatives, or participation in the UConn Compass program.

The following sanctions may be imposed upon registered student organizations (RSOs):

- Those sanctions listed above
- Any sanction as defined in *Blueprints: A Manual for Registered Student Organizations*.

For more information, including definitions and further explanations of possible sanctions, please see the latest version of the Student Code, found [here](#).
